SiteKiosk Online Server Quick Administration Guide

Note:

You will need detailed knowledge and experience on how to set up and configure a Windows server, mail server, firewall and other server components. PROVISIO cannot assist you in setting up a Windows server.

Server Installation

Step 1: Installation of the Windows Server

Begin by installing Windows Server (/2016/2019/2022 64Bit) and follow the installation instructions provided by that software. Once you have completed the installation, run Windows Updates and install all available server software updates. The Computer name must not be SITEKIOSK ONLINE SERVER, SITEKIOSK ONLINE SERVERADMIN or SITEKIOSK ONLINE SERVERCMS.

Step 2: Installation of IIS and Configuration of Windows Server Roles

Install IIS via the Roles Management. Make sure to check the boxes for the additional role services for HTTP Redirection, Windows Authentication, WebSocket Protocol and ASP.NET 4.6 (Server 2016) or ASP.NET 4.7 (Server 2019) support. You also need to install .NET Framework 4.8, the [IIS URL Rewrite 2.x](#) extension, [ASP.NET Core Runtime Windows Hosting Bundle 6](#) and [Application Request Routing](#).

Step 3: Install the local SQL Server (Not applicable for use with an external SQL Server)

Proceed by installing MS SQL Server including all available updates and service packs. Run the installation file and follow the prompts. During installation, please select "Win Only" as the authentication mode. When finished with the installation, make sure SQL server is running properly. SQL Server 2016-2022 are supported.

Step 4: Installation of SiteKiosk Online Server

Proceed by installing the SiteKiosk Online Server software. Execute the installer and follow the instructions on the screen. You will find detailed information about the installation of SiteKiosk Online Server including installation for use with an external SQL server in the [SiteKiosk Online Server Installation and Update Instructions](#).

SiteKiosk Online Server Configuration Tool

The SiteKiosk Online Server Configuration Tool allows you to make basic settings for the SiteKiosk Online Server.

Settings for the secured web site binding

Here you can assign the Web Application Root, SSL certificate and passwords for the Windows users utilized by SiteKiosk Online Server.

Automatic local database backup

Settings for the database backup and restoration.

We recommend to use the Microsoft SQL Server Management Studio, it allows you to conduct a comprehensive database administration.

Windows users having access to the administration page

This page allows you to add Windows users, that can access the server administration pages.

Weather Data API Key

Optional World Weather Online API key to use weather data within your projects. The key can be obtained from [World Weather Online](http://www.worldweatheronline.com).

The screenshot shows the 'Settings for the Secured Web Site Binding' window of the SiteKiosk Online Server Configuration Tool. The window title is 'SiteKiosk Online Server Configuration Tool'. The settings are as follows:

- Web Application Root:** (status: green checkmark)
- Web Site:** (status: green checkmark)
- Port:** (status: green checkmark)
- SSL certificate:** (status: red X)
- Host name:**
- Change passwords (usually not required):**

A red error message at the bottom states: **Select a certificate, please.**

Navigation buttons at the bottom:

Licensing / Activation

To use the SiteKiosk Online Server software, you must request a license file from PROVISIO in order to activate your server. Free 30-day trial licenses are available upon request.

Step 1: Logging in to the Administration pages of SiteKiosk Online Server

During the SiteKiosk Online Server installation your “public key” file was generated. You must send this file to PROVISIO to receive your license file. To login to the SiteKiosk Online Server Administration pages on the server, log in with a Windows local administrator user and navigate via Internet Explorer to the URL:

<https://localhost/administration/>
or
<https://IP-Address/administration/>

The SiteKiosk Online Server Administration pages are also accessible via the Windows start menu “-->Start-->Programs-->SiteKiosk Online Server-->Administration“

If you are accessing the SiteKiosk Online Server Administration web page from a different computer, use the URL or IP:

https://Servername_oder_ServerURL/administration/
or
<https://IP-Address/administration/>

The screenshot displays the SiteKiosk Online Administration web interface. At the top, there is a navigation bar with tabs for Teams, Licenses, News, Strings, Settings, and Logout. The main content area is titled 'Welcome' and includes a message: 'Please choose one of the above menu entries.' Below this, system status is shown: Version: 1.0.8537.0, Service: Running, Status: Accepting connections, and Error: -. There are three buttons: 'Start SiteKiosk Online Server', 'Stop SiteKiosk Online Server', and 'Restart IIS AppPools'. The 'Server License Information' section shows 'Teams: 82 of max Unlimited'. Below this are two tables: 'Client Types' and 'Features'.

Client Types	Online	Registered	Maximum
SiteKiosk Online Client	0	62	Unlimited
Total	Unknown	62	Unlimited

Features	Assigned	Maximum

Licensing / Activation

Troubleshooting tips for opening SiteKiosk Online Server Administration can be found in the [installation brochure](#) under “Solve problems when trying to access the SiteKiosk Online Server Administration web page”.

Step 2: Download the Public Key

Click the “Settings” tab then click the “Download public key” link. Save the .pub file on your computer and send it to sitekioskonline@provisio.com

After receiving the file, PROVISIO will generate a 30-day trial license key and email it to you. Please allow one business day upon sending of the “SiteKiosk Online Server.pub” file for our technical department to process your request. If you have already purchased SiteKiosk Online Server, send the public key along with the order information you received when you purchased to sitekioskonline@provisio.com to obtain a full license.

If you have purchased the license through a reseller, please contact your reseller.

Step 3: Upload the license file

After PROVISIO sends you the license file with the .license file extension, upload the file via the SiteKiosk Online Server Administration “Settings” page. Wait for the page to refresh then go to the main page of SiteKiosk Online Server Administration to check the status of the server.

License Data

Please insert the license name from the license document, then download the public key to request a full license. If no license name is available, please leave the field as it is, then download the public key to request a trial license.

License name: [Download public key](#)

Status: ● License file already uploaded.

Server Settings

SiteKiosk Online Server settings can be configured under the “Settings” tab of the SiteKiosk Online Server Administration pages. The back-end administration interface is available in English only. However, different languages are available for the front-end team account pages.

Server Address

Static IP Address where the server is accessible.

Additional Settings

You can make additional custom settings for alerts, software components and macro variables. Also you are able to choose the maximum upload size and set settings for logfiles and password rules. The basic settings for using [LDAP authentication](#) can also be found here.

Server Settings

Server address:	<input type="text" value="[All Unassigned]"/>
Notification settings:	Edit configuration
Software components settings:	Edit configuration
Macrovariables settings:	Edit configuration

Show application performance graphs:	<input checked="" type="checkbox"/>

Server Settings

SMTP Server

Your Email Server address e.g. "localhost". If you are unsure use the real DNS name. The SMTP server must be accessible without authentication

SiteKiosk Online Server Email Sender

Email address that will be displayed as the sender when SiteKiosk Online Server sends emails.

Email Sender Display Name

Name that is displayed as the sender of emails from SiteKiosk Online Server.

Support Email Recipient

Email address your customers will send inquiries to.

SMS License Key (optional)

SMS license keys can be purchased from SMS Gateway providers. Currently www.mobilant.net and www.clickatell.com are supported.

Screenshot Settings

This option lets you determine whether your customers will be able to create screenshots of the client machines. The last screen shot of a machine is displayed on that machine's overview page. You can also adjust the resolution and quality of the screenshots.

Terminal Map Settings

Integrate a map engine and allow your users to define a location for each terminal. This will be displayed along with additional status information on an overview map. Virtual Earth, OpenStreet and Google Maps are supported.

E-mail and SMS Settings

Terminal Map Settings

Used Terminal Map Engine:

Allow Map-Engine management for teams:

This service is optional! Please be aware that the required [Maps API](#) geocoder is only available for some countries!

Bing Maps license key:

Please Note: The SiteKiosk Online Server Licensee agrees to use the Service only for purposes that are legal, proper and in accordance with the Microsoft Bing Maps Platform APIs' Terms of Use and any applicable policies or guidelines. This service may stop working as Microsoft upgrades the API periodically. PROVISIO does not grant any kind of support for this service. If you have any problems then just change the terminal engine.

Click here to update map engine files:

Please Note: The updating process overwrites the map engine files with the most recent version. This will be necessary if the engine provider changes its API in a way that makes the terminal map feature unusable.

Server Settings

Customized Start Page

You can change the logo, the mouseover text and the favicon of your SiteKiosk Online Server.

Customized Imprint Page

The copyright information which is reachable from the start page of your SiteKiosk Online Server can be modified to your needs.

Team Management

General

By default, each new team is valid for 30 days for testing purposes without entering a SiteKiosk Online Server team account license. The team account license and disk space usage can be configured through SiteKiosk Online Server Administration.

Under “Teams-->Licenses-->Edit”, the existing team licenses can be edited directly.

Under “Licenses-->Generator” licenses can be created for a team member or customer to activate on a team account (-->Administration-->Licenses).

Active Teams

SiteKiosk Online Server allows you to efficiently manage anywhere from one to hundreds of team accounts. All currently running teams are displayed under the “Active Teams” tab.

Expired licenses

Displays all teams whose license has expired and can no longer be used.

Not signed up

Team accounts must be confirmed through email by the person who set it up. A team account will only be activated after successful email confirmation. An additional email confirmation message can be sent by the server administrator by using the Send Activation email link under Show-->Send Activation Email.

News Administration

SiteKiosk Online Server allows you to share current news and information with your clients/users.

The “News” is displayed on the overview page immediately after users have logged on.

Create New News Entries

To create a news entry, click the “Add New” button. News entries can only be displayed in one language.

Each news entry will include the following components:

- Date
- Header
- Text (HTML code is allowed)

The screenshot shows the 'News' section of the SiteKiosk Online Administration interface. It features a navigation bar with 'Teams', 'Licenses', and 'News' tabs. Below the navigation bar is a table with columns for 'Visible', 'Date', and 'Message'. A single news entry is listed with a checked 'Visible' checkbox, a date of '10/14/2021', and a message about SiteKiosk being available as an online service. An 'Add New' button is located at the bottom of the table.

News		
Visible	Date	Message
<input checked="" type="checkbox"/>	10/14/2021	<p>SiteKiosk Now Also Available as an Online Service</p> <p>The new SiteKiosk Online brings together the previous SiteKiosk, SiteRemote and one cloud service that can also be installed on-premise. Create your projects, distribute content to your clients and monitor them on a single platform.</p>

[Add New](#)

The screenshot shows the 'News' section of the SiteKiosk Online Administration interface with the 'Add New' button clicked. The navigation bar now includes 'Teams', 'Licenses', 'News', 'Strings', 'Settings', and 'Logout' tabs. The table has a 'Commands' column. The first row shows the existing news entry with 'Edit' and 'Delete' links. The second row is a form for creating a new entry, with a date field set to '7/15/2022', a 'Title' input field, and a 'Text' text area. 'Save' and 'Cancel' buttons are in the 'Commands' column.

News			
Visible	Date	Message	Commands
<input checked="" type="checkbox"/>	10/14/2021	<p>SiteKiosk Now Also Available as an Online Service</p> <p>The new SiteKiosk Online brings together the previous SiteKiosk, SiteRemote and SiteCaster products into one cloud service that can also be installed on-premise. Create your projects, distribute content to your clients and monitor them on a single platform.</p>	Edit Delete
	<input type="text" value="7/15/2022"/>	<input type="text" value="Title"/> <input type="text" value="Text"/>	Save Cancel

Strings and Languages

All languages and text shown in SiteKiosk Online Server are managed under “Strings”.

Strings

Select a language and search for the string you want to edit. Use “Compare to another language” to compare or create translations.

Information listed under Width refers to buttons that may not exceed a specific length.

Groups

Strings are arranged and categorized into groups referring to certain areas of the application.

For instance, \Web\pub\login.aspx contains strings used in the login dialog box.

Cultures

To create a user interface in the language “Afrikaans”, for example, just enable the desired language and then translate the most important text (strings).
